

Automatically Create an EC2 Instance Using AWS CloudFormation

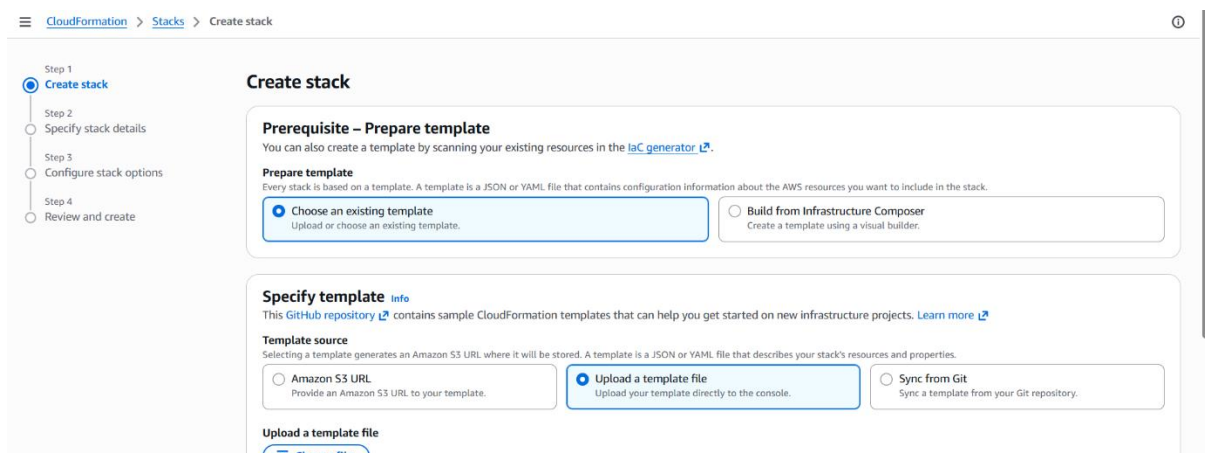

Step 1: Sign in to AWS

- Log in to the AWS Management Console.
- Open the **CloudFormation** service.

Step 2: Create a Stack

- Click **Create stack**.

Step 3: Choose a Template

- Select **Template is ready**.
- Choose **Upload a template file**.

```
AWSTemplateFormatVersion: '2010-09-09'

Resources:
  MyEC2:
    Type: AWS::EC2::Instance
    Properties:
      ImageId: ami-0b1b6332-49
      InstanceType: t3.micro
      SecurityGroupIds:
        - sg-0a1b6332-49
      SubnetId: subnet-0a1b6332-49
      Tags:
        - Key: Name
          Value: CloudFormation-EC2
```

Step 4: Create a YAML Template

Create a file named ec2.yaml and add your CloudFormation template.

Step 5: Upload the Template

- Upload the ec2.yaml file.

Step 6: Enter Stack Details

- Stack Name: ec2-stack

Specify stack details

Provide a stack name

Stack name

Stack name must contain only letters (a-z, A-Z), numbers (0-9) and hyphens (-) and start with a letter. Max 128 characters. Character count: 9/128.

Step 7: Configure the Stack

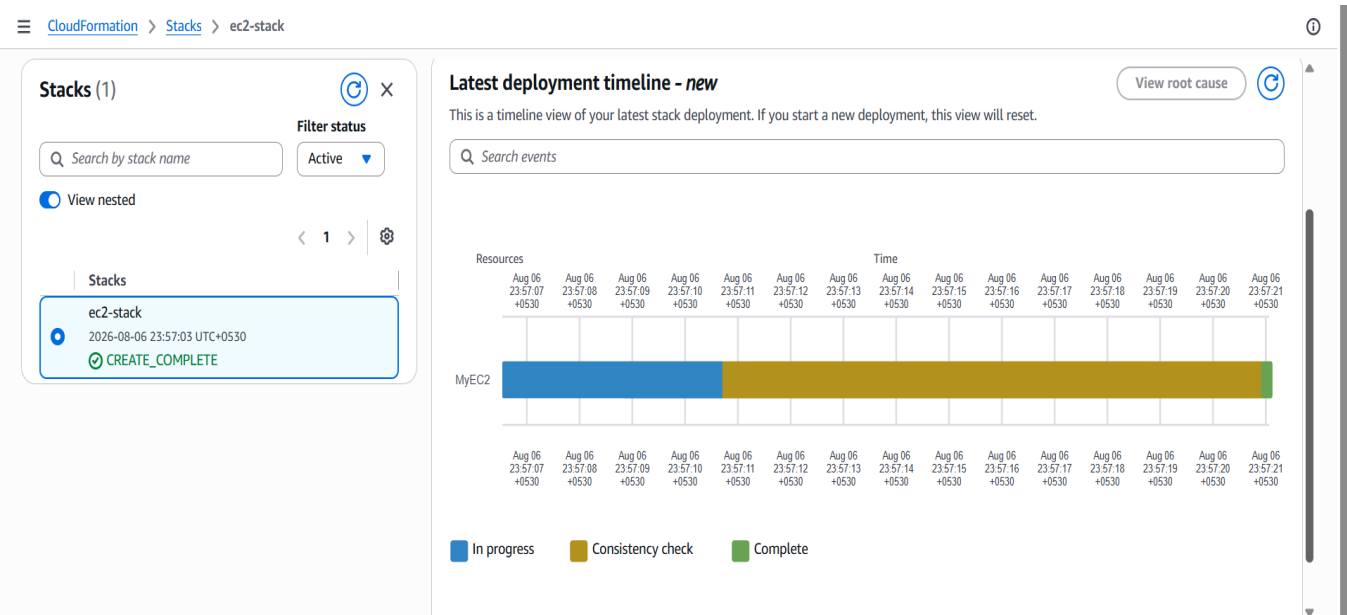

- Click **Next**.
- Keep the default settings (or modify them if needed).
- Click **Next** again.

Step 8: Review and Create

- Review the configuration.
- Click **Submit**.

Step 9: Wait for Stack Creation

- Monitor the stack status.
- Wait until the status changes from **CREATE_IN_PROGRESS** to **CREATE_COMPLETE**.

Step 10: Verify the EC2 Instance

- Open the **EC2 Dashboard**.
- Confirm that the EC2 instance has been created successfully.

The screenshot displays the AWS Management Console's EC2 Instances page. At the top, it shows 'Instances (1)' with an 'Info' link. A 'Last updated' timestamp indicates the instance was updated 'less than a minute ago'. Action buttons include 'Connect', 'Instance state', 'Actions', and 'Launch instances'. A search bar allows finding instances by attribute or tag. A filter is applied: 'Instance state = running'. Below this, a table lists the instance details:

☐	Name	Instance ID	Instance state	Instance type	Status check	Availability Zone	Public IPv4 DNS
☐	CloudFormati...	i-041a6fc28e1fbdabb3	Running	t3.micro	3/3 checks passed	us-east-1a	ec2-32-196-106-182.co...

Below the table, the 'All instances' section is visible, containing three panels:

- Instance alarm states:** Shows 'In alarm' as 'None' with a 'Show instances in alarm' link.
- Service health:** Shows 'EC2 service status' as 'Operating normally' with a 'View Service Health Dashboard' link.
- Health events affecting EC2 instances:** Shows 'Open events' and 'Upcoming events' as 'None' with 'Show instances' links. A 'View AWS Health Dashboard' link is also present.

At the bottom of the first panel, there is a 'View in CloudWatch' link.
